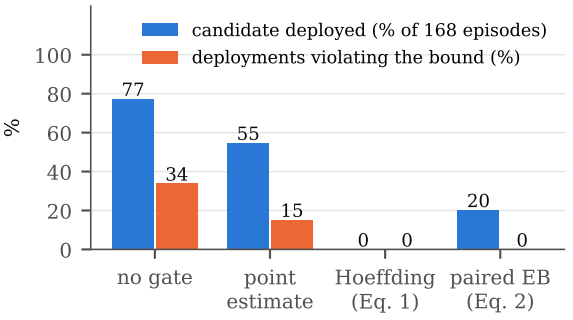
(a) Library rules degrade after a change
slo_wait / runtime shift
slo_wait / new task type
mix / capacity drop
mix / new task type
miss / new task type
+646% (FIFO → EDF)
+228% (FIFO → SPT)
+33% (EDF → WSJF)
+26% (EDF → WSJF)
+14% (EDF → SPT)
10^1
10^2
10^3
cost increase of the pre-change best rule (log)



(b) Deploy decision under four gates
candidate deployed (% of 168 episodes)
deployments violating the bound (%)
